

the Piper Focus

Full collaboration and imaginative design. From concept to reality.

A lot goes into designing and building a 20 foot custom salad bar, and working closely with the client is crucial to success. A Product Specialist will be with you from the beginning to gather details, estimate costs, and answer any questions. From there, a designated Customer Service Representative will continue to work with you and our engineers throughout the project to ensure design integrity. Every detail from size and electrical requirements, to stone top and laminate colors will be finalized and approved at this stage. Your representative will continue the conversation through the fabrication process and keep you updated on the status of your order. The final result will be a custom product designed precisely to your specifications and built to the highest standards, all while maintaining excellent customer communication.

From a hand-drawn conceptual sketch, to engineering drawings and 3D renderings, to the final installation details, the Piper team will work with you diligently to ensure every aspect of your order is met. Call Piper and start the process today!
